## **NASA Employee Benefits System**

The NASA Employee Benefits System (NEBS) is your online source for information regarding your employee benefits. NEBS provides benefits information in the following four areas:

1. **Benefits & Pay Web site:** This Web site provides information on all areas of benefits and pay including: awards and recognition, benefits, flexible spending accounts, health insurance, leave schedules, pay, thrift savings plan, and retirement.

2. **Benefits Handbook:** This online handbook is a general guide for you to use in understanding the benefits available to you. It provides links for you to quickly navigate through the handbook to the areas of particular interest to you.

3. **Benefits Statement:** This is your personal statement of benefits as extracted from the Federal Personnel and Payroll System (FPPS). When you request a Benefits Statement, it will include your personal benefits, pay, leave, insurance, estimates of retirement benefits, and other related information. Since this information changes throughout your career, it is updated on a bi-weekly basis and an "as of date" is listed on the statement for your convenience.
